

Amongst a great deal of very kindly criticism that has reached him during their publication in serial form (for which hereby he tenders his best thanks) the author of these pages has read one or two notices complaining that they are not sufficiently technical. He wishes to explain, therefore, that he never intended them to be a manual of farming, but rather what their title implies the record of one year of the daily experiences and reflections of an individual farmer. With the many existing and admirable works upon the subject he has neither the desire to enter into competition nor, in truth, the scientific and detailed knowledge necessary to such a task. Outside of descriptions of rustic scenes and events, which to some quiet minds are often pleasing, any interest that this book may possess, indeed, for the present or for future time, must be due in the main to the facts that it is a picture, or perhaps a photograph, of one facet of our many-sided modern life, and that it mirrors faithfully, if incidentally, the decrepit and even dangerous state of the farming and attendant industries in eastern England during the great agricultural crisis of the last decade of the nineteenth century.
