

# Tissue Engineering for Therapeutic Use 4: Proceedings of the Fourth International Symposium of Tissue Engineering for Therapeutic Use, Tokyo, 23rd-24th (International Congress Series)

This publication is the fourth proceedings volume in a series of Symposia on Tissue Engineering for Therapeutic Use, sponsored by the Japan Society for Promotion of Science (JSPS). The previous three volumes have all been published as part of the ICS series. The successful growth of the interdisciplinary field of modern tissue engineering requires a focused integration of biomedical engineering, life science, and clinical medicine. As we enter the new millennium, it is particularly appropriate to discuss the different hurdles tissue engineering has to identify, define and act upon to substantially contribute to clinical medicine. Current trends covered in this volume include: physiological roles of connective tissue growth factor (CTGF), bone tissue engineering on biodegradable scaffolds, strategies for mesenchymal or skeletal tissues, artificial nerve connection, and xenogeneic extracorporeal liver perfusion. Lessons are learnt from regeneration in animals and steps made towards developing clinical application from these.

November 22-23, 2018 4th International Conference On Genetic And Protein Engineering : Market, 26th Annual Conference On Clinical & Medical Case Reports In Cardiology . 24th Global Organic & Inorganic Chemistry Conference .. 13th International Conference On Tissue Engineering & Regenerative Medicine. July 23-24, 2018 2nd Annual Summit On Cell Signaling & Cancer Therapy Tokyo, Japan September 4th Biotechnology & Bioscience Conference 14th International Conference On Tissue Science, Engineering A biobank is a type of Biorepository that stores biological samples (usually human) for use in research.
