

This handbook, under the auspices of the Society of Chest Pain Centers, is the first roadmap to treatment of heart failure patients in an observation unit. It gives practitioners a full understanding of the medical requirements, administrative processes, and regulatory issues involved in observation unit care of heart failure patients. The authors offer practical guidelines for management of heart failure in an observation unit, including admission criteria, initial evaluation, treatment protocols, drugs that should and should not be used, and discharge planning. Appendices contain treatment pathways and algorithms; sample orders; discharge information; reminder cards; and diet instructions.

The Dead Sun (Star Force Series Book 9), Aspects of Fantasy: Selected Essays from the Second International Conference on the Fantastic in Literature and Film (Contributions to the Study of Science Fiction and Fantasy), Butter, Its Analysis and Adulterations, Nutrition: Your Life Science, The Hungry Clothes and Other Jewish Folktales (Folktales of the World), Raising Entrepreneurial Capital, Measurement of Nursing Outcomes: Measuring Nursing Performance : Practice, Education, and Research, Increasing Access to Health Workers in Remote and Rural Areas through Improved Retention: Global Policy Recommendations (With CD-Rom), The Art of Invisibility: The Worlds Most Famous Hacker Teaches You How to Be Safe in the Age of Big Brother and Big Data,
